TITLE OF ORDINANCE: Special

DEPARTMENT REQUESTING ORDINANCE: Purchasing

SYNOPSIS OF ORDINANCE: An ordinance approving the award of Ref. No. 0104 for a sludge pump for the Three Rivers Filtration Plant. The cost reflects the most responsive vendor.

S-90-10-17

IF NOT LOWEST, WHO WAS AND WHY WERE THEY NOT AWARDED:

EFFECT OF PASSAGE: A very heavy duty pump is required to move the sludge accumulated from the purification tanks to the sludge lagoons. The pump we have is over 42 years old and has been modified to meet our needs. It was sized for the job at the time of installation and then modified when our needs increased. The maintenance time and repairs that have been made on this pump far exceed the purchase price of a new pump. The pump that will replace it, will be placed on line and be tied up to the old pump in the event of failure, giving us back support.

EFFECT OF NON-PASSAGE: Not having said pump as requested would result in not being able to move purification sludge from the purification tank to the lagoons, therefore causing a back-up of sludge or water impurities. Sludge lines not being used could solidify and become blocked. Water treatment would be reduced and the production of drinking water would become diminished due to the build up of sludge in the purification tanks reducing the amount of water that can be converted and treated for drinking water purposes. Reduced production.
